(June 26, 2007) ANCHORAGE, ALASKA: Afognak Native Corporation announced today the purchase of Anchorage-based 3SG, Inc. 3SG was established in 2001 to provide computer network security and information technology management services.

Dean Clowers, Senior Vice President for Operations at Afognak said, “We have had a long standing relationship with 3SG, Inc. In fact we were one of their first clients in 2002.” Clowers continued, “We have been very pleased with 3SG’s service, innovative IT security solutions and professionalism so, when we learned 3SG was interested in selling, it was a natural fit to incorporate them into the Afognak ‘Family of Companies’. Afognak currently provides information technology management services to our Federal customers and this acquisition will allow us quick entry into the commercial market.”

3SG began as a small IT firm with aspirations of greatness, explains Brian Evans, General Manager of 3SG. “We started out renting a file closet on Spenard with nothing, not even bathroom facilities; we couldn’t afford them. To go from an initial investment of \$100 to a company with over 100 clients, providing services throughout the State of Alaska and the Lower 48 is a true American Dream.” 3SG stands for Three Simple Goals: Value, Relationship, Inheritability.

“Joining the Afognak Team provides a tremendous opportunity for our company. Afognak’s experience and resources will help us to continue to grow, provide premier services to our customers and expand our exceptional team,” Evans said. “We are truly excited for what this will mean for our customers.”

3SG provides IT security services, IT management services, hardware/software, and IT support. Afognak and its subsidiaries employ approximately 4,400 people in 48 states and 4 countries with operations in: Security & Law Enforcement; Operations & Maintenance Services; Logistics Support Services; IT & Technical Support Services; Engineering & Information Solutions; Construction and Youth Training Services.

Afognak Native Corporation is a village corporation formed under the 1971 Alaska Native Claims Settlement Act. Afognak is headquartered in Kodiak, Alaska and is owned by almost 700 Alaska Native shareholders, in perpetuity.
