Alutiiq wins National Safety Council award for work on project in Hawaii

HONOLULU, HI – The National Safety Council selected an Alutiiq Construction Division project for one of its highest honors - the 2011 National Safety Council Leadership Award. The council presented the award for Alutiiq’s work on the Hawaii Multiple Award Task Order Contract (MATOC).

The Council is the nation’s largest and oldest organization dedicated to saving lives by preventing injuries and deaths. Less than 2 percent of the Council’s 53,000 members received awards.

To win this award, a company, unit and/or facility must have achieved a minimum of five consecutive “perfect record” years operating without incurring occupational injury or illness to an employee or subcontractor. The U.S. Army Corps of Engineers, Honolulu District, oversees Alutiiq’s work in Hawaii.

“Alutiiq is honored to receive this award, which is an affirmation of our commitment to safe and exemplary work by our dedicated employees and highly skilled contractors in Hawaii,” said Dick Hobbs, Alutiiq’s President and CEO.

Alutiiq’s Construction Division provides a wide range of construction services for the military in Hawaii, including constructing a Combat Aviation Brigade Complex at Wheeler Army Airfield and a headquarters building at Hickam Air Force Base.

Alutiiq is dedicated to delivering cost-effective, quality service and solutions to its customers. In addition to an office in Honolulu, Alutiiq has operations worldwide, from Prudhoe Bay on Alaska’s North Slope to Japan.
