

ENGINEERING SERVICES

**Certified Technicians
Global Capabilities
Direct Experience**

Alutiiq Subsidiaries provide essential services needed to protect and defend critical systems

CAPABILITIES

- » Electronic Equipment Burn-In & Calibration
- » Electronic & Spare Assembly Warehouse & Storage
- » Fiber Optic & Electronic Cable Assembly Production
- » Installation & Logistics Management Services
- » C4IT System Testing, Repair, & Modification
- » In-Service Engineering Agent
- » Technical Documentation & Design
- » System Operational Verification Test
- » Metrology & Calibration
- » Fielded System Support
- » Repair & Maintenance
- » Electronic Equipment Reverse Engineering

PROVEN SUCCESS

Under our Electronic Harbor Security System total life cycle engineering and technical support services, Alutiiq Diversified Services, LLC protects the U.S. Navy's harbors from unknown threats. We provide installation and support to the SPAWAR Systems Center Pacific for a wide variety of complex, multi-use electronic systems. We also provide equipment for mobile teams, facilities, and ships on Naval Bases.

Alutiiq Subsidiaries provide technical solutions to complex engineering problems for multiple DoD customers across platforms in both CONUS and OCONUS locations. We use highly-effective systems to identify and implement solutions for a wide-range of technical challenges, including COTS radars, thermal and optical imagers, C4ISR workstations, telemetry services, and power systems, including generators and UPSs. We also perform critical reverse engineering services.

"The contractor developed and implemented a strategy to complete a major system upgrade at 12 operational sites. As a result of their planning and scheduling, the effort was completed approximately 2 months ahead of the mandated schedule...a major factor in the success of the EHSS program."

- CPAR excerpt from Contracting Officer for SPAWAR EHSS program

OUR CUSTOMERS

We have direct experience supporting Information Assurance (IA) requirements, including IA Vulnerability Alert compliance support and system software support.
