- » HAZMAT & HAZWASTE Services
- » Ordnance Management & Transportation

**PROVEN SUCCESS**

In 2012, Alutiig Global Solutions, LLC was awarded the \$30M contract to manage Logistics Support Services for GSA's Eastern Distribution Center (EDC) comprised of 962,363 SF of warehouse space, 31,020 rack locations, 36 outgoing and 42 inbound trucks daily, 1.9 million lines of material and 82,000 tons of material shipments annually. The contract was an example of velocity and flexibility excellence.

Alutiig Subsidiaries are trusted stewards of Government assets in environments of acute budget constraints. We develop key performance metrics across a wide array of material management operations, conduct trend analyses to help customers stay ahead of requirements, provide accurate reporting of transportation, material and inventory assets to achieve desired outcomes, and develop cost/benefit analyses to align our processes and procedures with best value. Today, we locate, manage, move and maintain Government assets in over 2M SF of warehouse space in multiple locations for both Federal agencies and military installations.

**"They did a great job of providing the government alternatives ...that ultimately saved the government time, effort and cost."**

*- 2015-2016 NASA Langley Logistics Support Services contract*

**OUR CUSTOMERS**

**Alutiig Subsidiaries have a reputation for solid, dependable performance providing services for highly visible Government agencies in mission-critical environments.**
